

NEHA SHINDE

Java Backend Developer | Software Developer

Pune, Maharashtra, India | 8669881003 | nehashinde20052612@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Java Backend Developer / Software Developer with hands-on experience designing, developing, and testing RESTful APIs and web services using Java, Spring, Spring Boot, and Hibernate. Solid working knowledge of SQL and relational databases (MySQL), OOP, and MVC architecture. Experienced in writing unit/integration tests with JUnit and Mockito, using Git for version control, and collaborating effectively in team environments. Strong analytical and problem-solving skills; quick to learn new frameworks and tools. Seeking an Associate Developer, Java Developer, Backend Developer, or Software Developer role.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL

Backend & Frameworks: Spring, Spring Boot, Hibernate, JDBC, Servlets, JSP, RESTful API Design, Microservices Fundamentals, Node.js, Express.js

Frontend & Databases: HTML5, CSS3, React.js, MySQL, SQL, Relational Databases, MongoDB

Testing & Tools: JUnit, Mockito, Unit/Integration Testing, Postman, Git, GitHub, Eclipse, IntelliJ IDEA, Apache Tomcat, Power BI, Excel

Concepts: OOP, Data Structures, Collections Framework, Exception Handling, MVC Architecture, Authentication & Authorization, SDLC

PROFESSIONAL EXPERIENCE

MERN Stack Trainer — NIIT Foundation

Dec 2025 – Mar 2026

- Delivered structured MERN Stack (MongoDB, Express.js, React.js, Node.js) training sessions at affiliated colleges, covering 50+ students.
- Designed a project-based curriculum enabling students to build full-stack applications, reinforcing REST API design and database concepts.
- Mentored students through real-world projects, improving hands-on coding proficiency and problem-solving skills.

Java Developer Trainee — HulhireTech

Apr 2025 – Oct 2025

- Developed and secured a multi-service, cloud-based platform using Java and Spring Boot, following clean, well-structured coding practices.
- Built and consumed RESTful APIs and worked with relational databases (SQL/MySQL) to optimize backend processes, reducing validation delays and improving performance.
- Wrote and maintained unit and integration test cases using JUnit and Mockito, achieving 100% transaction reliability.
- Participated in code reviews and team discussions, incorporating feedback to improve code quality.

Full Stack Java Developer Intern — Kiran Academy

Sep 2024 – Apr 2025

- Built and optimized responsive web applications using Java, Spring Boot, HTML, CSS, and JavaScript.
- Collaborated with cross-functional teams and stakeholders, using Git for version control, to deliver client-facing solutions on schedule.
- Enhanced website performance and user experience through code refactoring and frontend optimization.
- Participated in code reviews and technical discussions, actively learning new tools and best practices.

PROJECTS

SamsTrack | Java, Spring Boot, REST API, MySQL, JUnit

- Designed and developed RESTful APIs with a layered architecture following industry best practices.
- Implemented exception handling and input validation mechanisms; wrote unit tests to verify functionality.
- Performed API debugging and testing using Postman, and managed source code with Git/GitHub.

Eco-Eats | Core Java, OOP, Desktop Application

- Developed a Java desktop application promoting sustainable food choices, applying OOP principles and MVC architecture.
- Implemented intuitive UI and business logic layers, ensuring clean separation of concerns and maintainable code.

EDUCATION

Bachelor of Business Administration – Computer Applications (BBA-CA)

ASM College of Science, IT & Technology, Pune University | GPA: 81.70% | 2025
